

Variant O HMM diagnostic: GMMHMM(mix=3) converges to a non-regime basin (autocorr 0.2); GaussianHMM finds clean regimes (autocorr 0.97)

BEFORE: variant O HMM as currently saved (GMMHMM mix=3, BIC winner) rapid switching [test mean=0.66, share > 0.5=66%, lag-1 autocorr=0.17]

AFTER: variant O HMM refit as plain GaussianHMM clean regime persistence [test mean=0.31, share > 0.5=31%, lag-1 autocorr=0.97]
